EDUCATION

Columbia University, Barnard College

New York, NY

Bachelor of Arts in Mathematics-Computer Science

Expected May 2027

- **Relevant Coursework:** Advanced Programming, Artificial Intelligence, Discrete Mathematics, Intro Data Science
- **Awards:** Viking Hacks 2023 (1st Place & Best Design), Piranha Pool (3rd Place)
- **Activities:** **Handshake AI** – MOVE Fellow. **Application Development Initiative (ADI)** – Education Committee Member. **Google Developer Group** – Lead/Campus Organizer. **Women in Computer Science**, **DVC Blockchain** – ICC Representative. **Computing Talent Initiative (CTI) Accelerate** – Fellow.

EXPERIENCE

Barnard College

New York, NY

Research Assistant, Group Dynamics Lab (Prof. Kate Turetsky)

Mar 2026 – Present

- Developed an automated classification pipeline using the Claude API to screen 11,000+ psychology journal articles.
- Validated model outputs against human-reviewed labels, achieving 94% classification accuracy.
- Reduced literature screening time by ~80%, processing ~20 articles/minute.

Columbia Build Lab

New York, NY

Software Engineer

Sept 2025 – May 2026

- Led product design and front-end development for early-stage startups (Clyvara and Rubicon Robotics).
- Implemented Google Authentication via API integration, reducing login time by ~45% and improving signup completion.
- Developed production-ready React components and early design system foundations for startup MVPs.

Barnard College

New York, NY

Research Assistant, Programming Languages Lab (Prof. Mark Santolucito)

Dec 2025 – Mar 2026

- Investigated human and large language model (LLM) reasoning through instruction-free puzzle-solving experiments.
- Recruited 20+ participants and collected interaction data across 40+ hours of experimental sessions to evaluate reasoning behavior and problem-solving strategies.
- Supported experimental design, pilot testing, and dataset development for ongoing AI reasoning research.

North Carolina State University

Raleigh, NC

Research Assistant, Poole College of Management (Prof. Joseph Brazel)

Jan 2024 – Feb 2025

- Performed testing of research software and survey instruments used in behavioral accounting experiments, identifying logic errors ahead of deployment.
- Validated data consistency and reproducibility in study outputs across 100+ participant responses.
- Reviewed manuscripts and data visualizations for technical accuracy prior to submission to publication.

PUBLICATIONS

Brazel, J. F., Li, X., & Gold, A. *An Unintended Consequence of Full Population Testing on Auditors' Professional Skepticism*. SSRN Working Paper, 2024. [Link](#)

Contributed as a research assistant (data validation, experiment testing, manuscript review).

PROJECTS

AI & Machine Learning | *Python, scikit-learn, TensorFlow*

- Implemented A* search (N-puzzle) and CSP backtracking with forward propagation (Sudoku).
- Built an expectiminimax agent with alpha-beta pruning and heuristic evaluation for 2048 gameplay.
- Trained machine learning models including KNN, Logistic Regression, Random Forest, and AdaBoost with hyperparameter tuning using GridSearchCV.
- Developed and trained a convolutional neural network (CNN) for sign language image classification using TensorFlow/Keras.

SKILLS

Languages: Python, C/C++, JavaScript, HTML/CSS, SQL

Frameworks/Tools: Flask, Bootstrap, Svelte, React, Git, Figma, NumPy, Matplotlib, pandas, scikit-learn, TensorFlow
